

Sustainability Data Sheet

StoVeneer Wood

Timber resin brick slips, optimised for insulation systems

For product description see Technical Data Sheet (if available)

Information for building certifications in accordance with DGNB

Quality level (ENV1.2, in accordance with the criteria matrix, DGNB System Version 2018)	Does not correspond to any product group according to DGNB
Quality level (ENV1.2, in accordance with the criteria matrix, DGNB System Version 2023)	Does not correspond to any product group according to DGNB
Product-specific LCA values (ENV 1.1 and ENV 2.1)	in accordance with EPD
Product-specific life cycle (ECO1.1)	> 50 years in exterior application (in accordance with BNB)
Impact on acoustic comfort (SOC1.3)	not assessed
Cleaning instructions (PRO1.5 and TEC1.5)	see Technical Data Sheet
Easy to recycle building material selection (TEC1.6)	recycling is technically possible

Information for building certifications in accordance with LEED

VOC content (EQ Credit: Low-emitting materials)	0 g/l (without water) calculated according to the SCAQMD METHOD 304-91 (5.1) Met in accordance with LEED v.4
VOC and SVOC emissions (EQ Credit: Low-emitting materials)	not relevant, as exterior product
Formaldehyde emissions	not relevant, as exterior product
Recyclable percentage (post-consumer recycled content) (MR Credit: Sourcing of raw materials)	0 %
Recyclable percentage (pre-consumer recycled content) (MR Credit: Sourcing of raw materials)	0 %

Sustainability Data Sheet

StoVeneer Wood

Renewable raw materials (bio-based materials) (MR Credit: Sourcing of raw materials)	0 %
Information for building certifications in accordance with BREEAM	
Formaldehyde (Hea 02: indoor air quality)	not relevant, as exterior product
VOC content (Hea 02: indoor air quality)	0 g/l
VOC emissions (Hea 02: indoor air quality)	not relevant, as exterior product
SVOC emissions (Hea 02: indoor air quality)	not relevant, as exterior product
CMR substances (Hea 02: indoor air quality)	not relevant, as exterior product
Eco-labels and environmental labels	
Certificates, eco-label, environmental label	None
Environmental Product Declaration (EPD)	 EPD-VDL-20240609-IBN1
GISCODE (in accordance with GISBAU)	not known
Safety Data Sheet (SDS)	not available
Technical Data Sheet (TDS)	available
Product ingredients	
Composition	not collected (scope 3)
Organic component (in accordance with natureplus, baubook)	not collected
Hazardous substances (in accordance with EU regulations)	not present

Sustainability Data Sheet

StoVeneer Wood

CMR substances (VOC)	not collected
VOC content (in accordance with Directive 2004/42/CE)	not subject to the guideline
Plasticiser	not assessed
Free formaldehyde	not assessed
Biocide(s), active substance(s) for protection of the coating (in accordance with Regulation (EU) No 528/2012)	not present
Biocide(s), active substance(s) for protection of the product during storage (in accordance with Regulation (EU) No 528/2012)	present
Heavy metals	not assessed
Compliance with the emissions restrictions of the titanium dioxide industry (in accordance with Directive 2010/75/EU and 25th Ordinance for the Implementation of the Federal Immission Control Act)	not applicable, as titanium dioxide is not present in the product
SVHC in accordance with the chemicals regulation REACH (EG/1907/2006), notes XIV	not present
Emissions, CO2 balance sheet	
Carbon dioxide value (manufacturing A1-A3) (cradle-to-gate)	0,86 kg CO2e / kg
Carbon dioxide value (life cycle A1-D)	1,17 kg CO2e / kg
Semi-volatile organic compounds SVOCs	see Environmental Product Declaration (EPD)
Disposal, re-use, recycling	

Sustainability Data Sheet

StoVeneer Wood

Disposal of residue

can be fed to a collection system for material recycling

Disposal of dismantled building material

can be recycled as building materials, refer to EPD chapter 2.14 and 2.15

Packaging, pallets, films

The return of used packaging and its correct recycling is organised and certified in accordance with the statutory requirements with a regional disposal company.

Sto corporate responsibility

Guiding principles, management of the company

Sto's vision is to be the technology leader in the sustainable design of living space tailored to human needs. Worldwide. For further information please visit: www.sto.com

UN Global Compact - membership

Sto is a member of the UN Global Compact and is committed to upholding ten universally acknowledged principles taken from the areas of human rights, labour standards, environmental protection, and anti-corruption. For further information please visit: www.unglobalcompact.org

ILO fundamental conventions

Sto has committed itself to adhering to the ILO fundamental conventions at all of its locations.

Quality management, environmental management, energy management

Production location certified in accordance with DIN EN 9001, DIN EN 14001, and DIN EN 50001.

Supplier code of conduct

The Sto Supplier Code of Conduct is based on the principles of the UN Global Compact and the Sto Guiding Principles. Suppliers must adhere to these and are continuously evaluated.

Sustainability Data Sheet

StoVeneer Wood

This document aims to help you better assess the sustainability of our products. We consider sustainability to be a complex process that involves bringing together economic, ecological, and social criteria in order to satisfy the needs of current and future generations. Our products aim to contribute to this, while also meeting the requirements placed on them with respect to well-being, quality, and functionality. We regard sustainability as a process of continuous improvement, not one with an end result. With this in mind, we have defined the following core statements for our products:

1. Sto products make a contribution to key aspects of sustainability: e.g. climate protection, building, energy, and resource efficiency, protection and durability, health, and well-being.
2. All of the raw materials used in Sto products fulfil the functions for their application and are optimised with respect to their impact on the environment - based on the latest technology.
3. Sto products are produced in an energy and resource-efficient manner; renewable raw materials are used when appropriate and acceptable from an ecological, economical, and social perspective.
4. Sto evaluates and promotes the potential to dispose of, reuse, and recycle its products, taking technological and economical feasibility into account.

It is not just down to us to determine how the sustainability of our products is interpreted and evaluated - your opinions and decisions also play a role. The information listed here, which has the environment and health as its main focus, aims to assist you in this regard.

The information and data contained in this sustainability data sheet is based on our knowledge and experience. The publication of a new sustainability data sheet invalidates all previous versions. Please observe the information in the Technical Data Sheet and Safety Data Sheet. The latest version is available on the Internet.
