

StoLite Stucco System

Lightweight stucco system
on fibre cement sheet

StoLite Stucco System

Lightweight stucco system on fibre cement sheet

Stucco dating back to the application of mixed clay plasters in pre-Biblical times has traditionally been used to decorate and protect buildings.

Embracing this concept, Sto has specifically engineered the StoLite Stucco System, a lightweight Stucco on backerboard which offers a proprietary system to clad timber framed construction. In addition, by selecting the appropriate fibre cement sheet; the strength, bracing and acoustic properties of the exterior can be adjusted to meet the site conditions.

Reinforced with a StoArmat Render System for maximum system longevity, and security, and complemented by a diverse range of Stolit Finishing Renders, the StoLite Stucco System ensures a complete weather-tight facade solution with a comprehensive StoWarranty.

Sto, an international brand

Selected with confidence worldwide

Growth from a solid foundation

Establishment in 1835, Sto has undergone an astonishing course of development, from a simple German lime and cement works into one of the leading suppliers of facade insulated systems; a manufacturer of high-quality exterior and interior render systems and coatings worldwide.

Sto encompasses subsidiaries and distribution partners in over 50 countries across the globe. This focused presence provides Sto with a precise understanding of local climatic conditions, architectural styles, building practices, standards and tastes.

As the authorised partner of Sto for Australasia, Stoanz Ltd is committed to the Sto philosophy, "Building with conscience". Today, having developed a full range of Sto Render Systems that have been tested and certified by BRANZ for the market, Sto is recognised as a leader in the rendered facade and cladding market.

We always respect nature and look after your interests

In order to define and implement its ecological targets, Sto has developed a system of environmental management which conforms to international standards. This relates to the entire process chain - from the procurement of raw products, to production, packaging and logistics. Sto makes a clear contribution towards improving and preserving the quality of the environment.

People and architecture; Sto provides the link

Architecture plays an important role in our lives; lending urban and rural landscapes character, whilst ideally preserving an intact environment. For Sto, "Building with conscience", means enhancing functionality and aesthetics on a sustainable basis and creating an environment in which people feel at one with their surroundings.

StoLite Stucco System 6/12mm

Lightweight Stucco Cavity System on Fibre Cement Sheet

A cost-effective approach, providing the latest technology with an innovative edge, creating systems that promise longevity and investment value from a recognised leader - Sto.

StoLite Stucco System

StoLite is a BRANZ appraised render system. Application includes a lightweight mineral based basecoat over the selected fibre cement sheet, providing a thick solid base. Followed by StoArmat render reinforced with glass fibre mesh, providing engineered reinforcement to reliably dissipate tensile, seismic and shear stress.

Finished with perfectly interlocking components: Stolit fibre-reinforced coloured finishing render plus StoColor or StoClear; creating a weather tight reinforcement system for reliability and protection that surpasses the facade durability requirements.

Perfect interaction

1. Substrate: Fibre Cement Sheet

Selected to meet site conditions. (Minimum 6.0mm thickness. Installed by a third party LBP contractor as specified by NZBC requirements.)

2 Basecoat: StoLevell Novo / LevelLite Mineral Render

Lightweight, EPS bead mineral render with good build properties, water retention agents and machine application properties.

3. Reinforcement Render: StoArmat Render

An organic, weather resistant, cement-free and breathable, high-impact render, with a crack resistance six times higher than that of standard cement-based plasters.

4. Mesh: Sto Glass Fibre Mesh

Easy-to-install, meets the highest requirements for crack, stress and alkalinity resistance.

5. Coloured Finishing Renders: Stolit Renders

Organically bound, highly weather resistant, strong, hard-wearing, impact-resistant, pre-coloured finishing renders.

6. Facade Coating: StoColor or StoClear

StoColor coating based on IQ Technology for functional facades or a StoClear sealer.

StoArmat 20 Year Warranty
with StoService Assurance

The StoLite Stucco System utilises StoArmat reinforcement render and Stolit finishing renders which are manufactured in Germany for guaranteed quality and application consistency. Sto organic, cement-free renders have evolved over 50 years with a successful global history covering over 100 million square metres.

Crack resistance

The impact of climate conditions and seismic activity can seriously threaten your property's facade. StoArmat reinforcement promises a crack resistance six times higher than that of standard cement-based plaster, durability against mechanical and seismic stresses, plus impact resistance; ensuring maximum system reliability and longevity for your building facade.

Weather resistant

StoArmat and Stolit finishing renders guard against the weather and changing climate conditions to prevent and protect buildings from water damage. All Sto cement-free renders are polymeric, allowing them to repel water far better than traditional thick-coat plasters.

StoArmat bend test

StoArmat impact test

A bend test demonstrating extraordinary flexibility and an impact test proving the high-fracture resistance of StoArmat renders.

Vapour permeable

StoArmat and Stolit finishing renders promote breathability and water vapour permeability, preventing moisture from being trapped between the render and substrate. Water retention behind the cladding is thus avoided, whereas with elastomeric plaster or paint, water can build up behind the coating, eventually leading to blistering.

The StoWarranty

Application is carried out by a Sto Registered Contractor (Licensed Building Practitioner) and comes with the added protection of a StoArmat 15 or 20 Year Warranty with StoService Assurance, ensuring the materials used and application, meets building code standards, including a service plan for long-term performance.

Sto Render System

Blistered coating

Water vapour molecules pass through Sto renders and coatings while still promoting maximum weather-tight properties. Elastomeric plasters and paints can result in facade blistering and distortion as water vapour molecules become trapped.

Stolit: Coloured finishing renders

Providing your facade with optimum protection

Stolit organic finishing renders are certified globally and successfully applied to rendered substrates in every climatic zone for over 50 years.

Stolit finishing renders provide the perfect combination of properties: weather resistant, durable, hard-wearing, impact-resistant, malleable, colour-stable, highly resistant to microorganisms and vapour permeable allowing your building to breathe while still repelling water.

Furthermore, opposition mineral renders rely on paint to achieve stability and colour, but even minor wear and tear exposes the unpainted render underneath. Stolit finishing renders are through-coloured, so the intensity of colour and everyday wear will not affect the appearance or stability of the rendered exterior facade.

Whichever finishing render is chosen, each one is part of a tested and approved system, providing optimum protection and durability.

Benefits at a glance

- Available in the full spectrum of colours.
- Extremely low water absorption.
- Optimum surface adhesion.
- Shock-proof and highly resistant to cracks.
- Exceptional resistance to mechanical stress.
- Outstanding colour stability and product stability process – does not require an equalisation coat.
- Excellent application properties.

Stolit MP

Stolit MP Natural

All Stolit renders are easy to apply and can be tinted using the StoColor System or matched to the colour of your choice using the Sto Spectrometer.

Stolit K 1.0mm

Stolit K 1.5mm

Stolit K 2.0mm

Stolit K 3.0mm

Stolit renders are polymeric, allowing them to repel water and breathe, providing extra long-term protection superior to traditional, painted plaster systems.

Stolit Milano

The perfect finish

Facades as individual as you and your project

The StoColor System

The StoColor System with 1000 colour shades, or AC Architectural Colours with a range of 300 colour shades, provide a systematic approach to colour based on integrated layers, combining texture and colour to complement the architectural structure and design.

Alternatively, the colours of your choice can be matched electronically.

Tested protection and quality

Sto facade paints or clear sealers establish easy-to-maintain surfaces and an outer layer of the Sto protection system, fulfilling important building requirements in terms of maintenance and functionality.

Sto has been conducting intensive research in the field of bionics for many years. The result: facade paint with iQ – Intelligent Technology where innovative surface functions provide clear added value.

StoColor Maxicryl	StoColor Dryonic®	S-Protect SC Clear Sealer
A natural looking, matt acrylate facade dispersion paint with high covering power and colour fastness. Suitable for masonry, brick, precast and all Sto rendered substrates.	Biomimetic facade paint with Dryonic® Technology, for dry and clean facades to protect against algae and fungal attacks, with SunBlock and X-black Technology.	Invisible silane treatment to repel water instantly and help prevent the adhesion of contaminants.
<ul style="list-style-type: none"> • Excellent hiding power. • Easy, simple application. • Natural matt finish. • Full colour selection. 	<ul style="list-style-type: none"> • Can be applied to virtually all conventional construction substrates, render, concrete, brick, metal or wood. • Dryonic® Technology for dry and clean facades to protect against algae and fungal attacks. • High level of colour stability thanks to SunBlock Technology. • X-black (heat reflective) Technology keeps the facade temperature below +65°C. • Slight silk gloss visible depending on angle. • Full colour selection. 	<ul style="list-style-type: none"> • Invisible silane treatment for the Stolit MP range and Stolit Milano render finishes. • Hydrophobic (water repellent), the treated facade stays dry. • Helps keep the facade clean, by preventing the adhesion of contaminants that are easily removed naturally by rain. • Invisible finish.

Well advised

Let yourself be inspired

Individual customer consultation and project support is the basis of a successful business relationship at Sto. Whether on the telephone, in the sales centre or on the construction site – the Sto team will be pleased to provide you with advice, assistance and creative ideas.

Sto customer service

Service at Sto goes far beyond the development and sale of high-quality products. Ultimately, any product is only as good as its application. This is why Sto places great emphasis on service and consultation. The Sto team are here for their customers, providing comprehensive information and tips on the practical use of new products and relaying detailed knowledge from the Sto technical department.

Smart and sustainable

Sto's impact on performance is big, but the footprint on the environment is small. All Sto products are vapour permeable, easy to apply, safe and non-toxic with low VOCs. Sto incorporates sustainable practices throughout its operations, earning ISO 9001 for quality assurance and 14001 certification for their environmental management system. Many Sto products help reduce the environmental impact of construction by providing insulation, reducing maintenance requirements and extending the life cycle of building facades.
